

## Pneuvac Pump

The Royal Pneuvac pump is a simple, low-cost device that generates a strong vacuum when compressed air flows through its internal venturi.

All you have to do to operate the unit is:

- Connect the pump and hose to a standard 55-gallon steel drum
- Hook up a compressed air supply to the pump
- Drop the free end of hose into the coolant
- Open the air valve
- Coolant and sludge is drawn through the hose and deposited into the drum – quick, clean, and hassle-free

Removing old, rancid coolant from machine tool coolant sumps has always been a dirty, time-consuming job – but now it doesn't have to be. The Royal Pneuvac Pump allows you to clean your sumps quickly, safely, and easily!

## Pneuvac Pump Sets

## Set includes:

- 1/4" ball valve
- Automatic shut-off valve
- 10 ft. of smooth-bore hose
- Quick-disconnect drum fittings
- 18" aluminum wand

## CAUTION:

1. Do not use the Pneuvac pump with flammable or volatile liquids such as gasoline, alcohol, kerosene, aviation fuel, mineral spirits or any similar liquid with a low flash point
2. Do not modify this product to pressurize drum to pump liquids out. Pressurizing drum could cause an explosion that may result in serious injuries.
