

## Saw Arbors

### Slitting and Slotting Saws

- Hardened and precisely ground
- Rigid arbors with extended length can reach areas that standard short arbors cannot
- Each arbor is ground for precision within 0.002" on diameter and 0.0004" T.I.R. (see drawing and table)
- Super low profile cup allows cutter to get closer to working area
- Plug style cup gives extra support and rigidity when working with larger diameter saws

### Weldon and R8 Shanks

- Rigid and precision design
- This versatile arbor offers flexibility in sawing operations
- The spring loaded mechanism accepts saw blades with hole diameters from 1/2" to 1"
- The saw blades are firmly secured in position with a hex socket screw
- Rust resistant, black oxide finish
- Arbors are provided with one hex wrench and one screw
